You can make sketches, draw free-hand on a paper and share them online and offline.Q: Loopback: call another model's method and set the result as a property of the current model I have two Models in my loopback project. One is Product and the other is Review. product.model.ts const productSchema = new mongoose.Schema({ name: String, display_price: Number, tags: [String] }) export class Product { name: String; display_price: Number; tags: [String]; constructor(data: any) { if (data !== null && data !== undefined &&

```
data.constructor === Object) { Object.assign(this, data); } } static findAllByTags(tags: String): Product[] { return
Product.find({ tags: tags }).select('-name display_price'); } review.model.ts const reviewSchema = new mongoose.Schema({
description: String, rating: Number export class Review { description: String; rating: Number; Object.assign(this, 82157476af
